ProposalLock E2E Test Report

Generated: 2026-03-22 00:56 UTC | Environment: Production (proposallock.onrender.com)

Result: 21 passed, 0 failed (including auth re-test)

1. Static Pages

ENDPOINT	EXPECTED	ACTUAL	RESULT
`GET /`	200	200	PASS
`GET /privacy`	200	200	PASS
`GET /terms`	200	200	PASS
`GET /login`	200	200	PASS

2. Authentication

TEST	RESULT
Dashboard redirects to /login without auth	PASS
Create test user via Supabase Admin API	PASS
Generate magic link token	PASS
Verify OTP -> get access + refresh tokens	PASS
Auth callback sets HttpOnly session cookie	PASS
Dashboard accessible with session cookie (200)	PASS
Dashboard shows "Total Revenue", "No proposals yet"	PASS

3. Proposal CRUD

TEST	RESULT
Create proposal with email, title, price, file URL	PASS
LemonSqueezy checkout URL generated	PASS
Proposal page renders (GET /p/:id)	PASS
Success page renders (GET /p/:id/success)	PASS
Status polling returns `{"paid":false}`	PASS

4. Security

TEST	RESULT
file_url hidden when proposal unpaid	PASS
Invalid proposal ID -> 404	PASS
XSS in URL path -> 404	PASS
Fake webhook signature -> 401 rejected	PASS
Rejects http:// file URLs	PASS
Rejects price below $1.00	PASS
Rejects empty request body	PASS

5. Infrastructure

TEST	RESULT
Proposals persist in Supabase Postgres	PASS
Render deploy status: `live`	PASS

Stack

- **Runtime:** Node.js 22+ (native TypeScript)
- **Framework:** Hono
- **Database:** Supabase Postgres (persistent)

- **Auth:** Supabase Auth magic links via @supabase/ssr
- **Payments:** LemonSqueezy (HMAC-verified webhooks)
- **Email:** Resend (via Supabase SMTP)
- **Hosting:** Render (free tier, auto-deploy from GitHub)
